DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in the pending application. Note, the new application data sheet, filed on 09/13/05, which now acknowledges the filing of foreign priority has been reviewed and is accepted.

Response to Arguments

2. Note, the cancellation of claims 1 and 2 is noted along with the rewriting of claim 3 in independent form, including all of the claim limitations of claims 1 and 2. The amendment to claim 3 was performed because claim 3 was previously objected to as containing allowable subject matter but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. Applicant's arguments, see pages 6 and 8 of Applicant's Remarks, filed 09/13/05, with respect to objection of the specification have been fully considered and are persuasive. The objection of the specification has been withdrawn since minor informalities have been corrected.

Allowable Subject Matter

4. Claims 3-11 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claim 3, the prior art (Ji et al. (U.S. Patent 6,686,923 B2), Fujiwara et al. (U.S. Patent 6,343,100 B1), Otera (U.S. Patent 6,507,346 B1) and Hong (U.S. Patent 5,708,474)) does not explicitly disclose generating the weighted average value of a pixel in question by multiplying a luminance value of a bottom pixel in the common-field pixel pair by a weighting coefficient, multiplying the compliment of the weighting coefficient by a cross-field pixel luminance value and summing the two products together, in combination with the further limitations of claim 3.

In reference to claims 4-11, claims 4-11 depend upon allowable to claim 3 and are therefore also deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

References Cited

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. Hong (U.S. Patent 5,708,474)
 - Hong discloses a method and apparatus for interpolating a scanning line of a TV signal wherein vertical, horizontal and diagonal variations of a received video signal are considered and combined with a weight value to compute an interpolated value.
